

Welcome to the Essential Health Summit App!

The event app is your virtual guide to the Summit and will be your one-stop-shop for key event information, updates, getting connected and more.

The below information will assist in getting you connected and ready.

For any further questions or issues about the app contact essentialhealthsummit@jtproductionmanagement.com and our team will be able to assist.

Access and log in

With your Essential Health Summit registration we have automatically registered you to the event app and access is now open.

App access is exclusive to those currently registered to the event with any information shared accessible only to those signed in with your email address and the password you will set up.

You should have received an email from 'Essential Health Summit', if it is not in your inbox please check your 'junk' or 'spam' folder as sometimes these emails will end up there.

This email contains a link that will take you to the app login page on the web browser of your phone, tablet or desktop. From here please enter your email address and select the button requesting your auto-login link.

This link will be emailed to you and allow you to set up your password and access the app. Please note, this process only needs to be done the first time as once you're set up you will be able to use your email and chosen password on any device you wish to access the app.

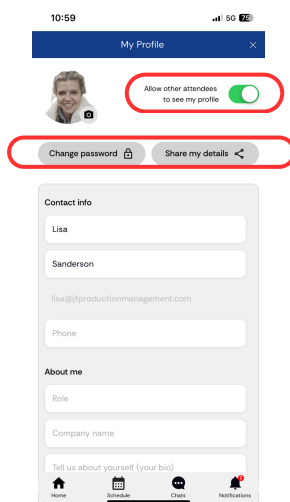

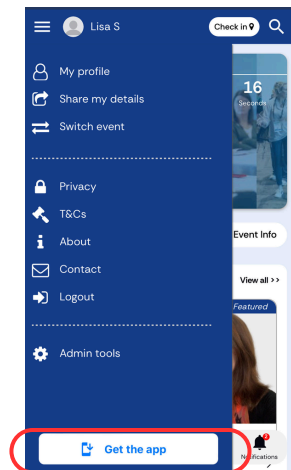

Now that you have access the following page contains three handy tips to assist in useability and making the most of the event app.

1. Installing the app on your Home Screen

Once you have successfully logged in you can continue to access via your web browser or alternatively select the three dash menu icon on the top left of your screen and the "Get the App" button.

This will open instructions on adding the app icon to the home screen and allow for easy access on your mobile device.

2. Updating your profile and privacy settings

Next to the three dash menu icon you will notice your name and an alias image. By selecting this image your profile will open and here you are able to upload your own headshot and update key information including role, company, bio and social media profile.

On this page you are also able to toggle on/off whether you allow other attendees to see your profile, change your password and share your details with a specific attendee.

3. Booking into up to Masterclasses and adding sessions to your schedule

You are able to use the app to plan your event attendance, book into for masterclasses and block out time in your outlook or gmail calendar ensuring you won't miss those key sessions.

Simply head to the 'Schedule' and tap 'Going?' and these sessions will automatically add to your 'My Schedule' tab. Within this tab you can then select 'Add to calendar' and choose Google or Outlook and the specific session will save to your calendar blocking out only the session times needed.
